# 10MWh Off-Grid Solar Container in South Africa

## Overview

---

What is an off-grid container solar system?

An off-grid container solar system requires battery storage that must be designed correctly to generate enough power throughout the year and have the necessary battery capacity to meet the installed location's electrical energy requirements. Containers can offer the advantage of mobility that allows them to be moved to different sites.

How do off-grid solar systems work?

Off-grid solar systems operate independently from the electricity grid and rely on battery storage. They must be carefully designed to ensure year-round power generation and to meet the electrical energy needs of the location where they are installed. In areas with abundant sunlight, like Africa, these systems can work well.

How are off-grid solar power systems sized?

Generally, off-grid solar power system sizing or specifications are based on your daily wattage usage and peak Wh requirement. Daily watt-hour usage can normally be calculated from your utility bill over a time period but may require more accurate usage pattern monitoring with energy metering data loggers.

What is a 100kW off-grid system in Mozambique?

100kW off-grid in Mozambique. 100kW/300kWh solution for Macadamia farm in Northern Mozambique. 300x 550W panels. Logistical support to transport and install system in remote. 1.5MW off-grid system for Sawmill. Off-grid solution for sawmill consisting of 2300 Panels coupled to 1.5MW inverter and 2.2MWh of batteries.
