

10kv uninterruptible power supply configuration

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supplies (UPS) are installed for mitigating risks to critical infrastructure and to protect business continuity during a power outage.

What is a 10kVA SRV ups?

This 10kVA double-conversion on-line tower UPS provides pure sine wave power to support critical electronics during power disruptions. The SRV comes with hard wire 3-wire (1P+N+E) input and hard wire 3-wire (1P+ N+E) outlet.

Why are uninterruptible power supplies important?

Uninterruptible Power Supplies have been an important element in critical power protection schemes. Over time many different system configurations have been developed to mitigate the risk of loss of utility power.

How can ups harness maximum power capacity within a finite space?

Over the years UPS designers have come up with ways to harness maximum power capacity within a finite space. This is often achieved by scaling the number of UPS systems in a configuration to cope with the; load requirement, budget, existing infrastructure and risk tolerance.
