

12v charging and discharging dual-purpose inverter

Overview

What is a power inverter with a built-in battery charger?

Power inverters with built-in battery chargers provide a reliable uninterruptible power supply (UPS) for homes, offices, and off-grid systems. These advanced inverter chargers automatically switch between battery power and utility AC power, ensuring that your appliances and electronics continue running during a power outage.

Can you use a 12V rated inverter charger to power a battery?

You can use a 12V rated inverter charger to power it. The maximum capacity is 600ah, similar to the series. The difference is the voltage because in a series connection it goes up to 36V. If batteries are in a parallel connection, the inverter charger must supply the current needed by every battery.

What is a solar inverter charger?

All in one inverter charger: we also called Solar inverter charger, it has built-in MPPT solar charge controllers, you can directly use solar energy, AC grid, generator Or a combination of several to charge your batteries. It is a very common inverter, which is widely used in household solar off-grid systems, RVs, motorboats, etc.

How does an inverter charger work?

During an outage, it instantly draws DC power from your battery bank and converts it into clean 120-volt AC electricity, providing a smooth, worry-free backup power solution. Ideal for home backup systems, off-grid cabins, and RV setups, inverter chargers eliminate the need for manual switching or separate charging equipment.
