

25 kW solar water pump

Overview

What is a solar water pump?

The solar water pump also known as solar pumping system, solar submersible pump or solar pump, is a water lifting system powered with electricity generated by solar panel. Solar pump directly connects with solar panel through a MPPT solar pump controller.

What is a solar submersible pump?

This pump keeps inside the water and lifts it out. Solar submersible pump is the most selling pump in India as the depth of water level is very low in maximum areas. If the depth of water is less than 15 meters and if you want to lift water to ground or above the ground level, solar surface pump will be the best choice.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

Who makes solar water pumps?

As a solar water pump manufacturer, Oswal Pumps Limited has been at the forefront of developing cutting-edge solar pump technologies. The company has a team of experienced engineers and technicians who work tirelessly to design and produce high-quality solar water pumps that are both reliable and efficient.
