

25kW Photovoltaic Container for Airport Use

Overview

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

Why do airports need solar energy?

Solar is one of the most convenient source of renewable energy for Airports. The plain topography, presence of flat building roofs and nature of Airport operational requirements favors solar PV as compared to other sources of renewable energy. Solar PV projects are also a visible means to demonstrate the implementation of environmental policies.

How do airports choose a solar PV plant?

Some of the basic studies/assessments airports need to consider while selecting a site for the solar PV plant are- • Availability of space • Availability of solar resource & climatic condition of the site • Site's ability to comply with aviation specific requirements etc. 2.1.

Why are airports a good location for solar PV?

Solar PV works best where the electricity can be generated and consumed within nearby proximity. This is one of the central reasons why airports are good locations for solar PV airports are as high energy consumption facilities.
