## Overview

---

What is a battery energy storage system (BESS) container?

Battery Energy Storage System (BESS) containers are a cost-effective and modular solution for storing and managing energy generated from renewable sources.

What size battery energy storage container do I Need?

From small 20ft units powering factories and EV charging stations, to large 40ft containers stabilizing microgrids or utility loads, the right battery energy storage container size can make a big difference.

What is a battery energy storage container?

A well-structured battery energy storage container optimizes internal airflow, reduces cable loss, and ensures better thermal control. For example, two 40ft BESS containers with the same capacity can perform very differently depending on their internal configuration.

What is the capacity of a CATL battery?

CATL serves global automotive OEMs. It is the global volume leader among Tier 1 lithium battery suppliers with plant capacity of 77 GWh (year-end 2019 data). Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy capacity range of 1.0 – 2.9 MWh per container to meet all levels of energy storage demands.
