## Overview

---

Why are oil storage tanks important in the refining industry?

In the refining industry, oil storage tanks are indispensable for containing large volumes of flammable liquids within the oil supply chain. These units enable safe operation in production, transportation, distribution, and storage of strategic hydrocarbons.

Does Morocco need a refinery?

Despite some arguing that Morocco has no need for a refinery, Yamani pointed out that forecasts predict oil will remain a significant player in the global energy mix even beyond 2050. This continued demand is fueled by the world's ongoing energy needs and the slow growth of renewable energy sources.

What are refinery storage tanks?

Refinery storage tanks are primarily divided into crude oil tanks and refined product tanks. Typically made of stainless steel to prevent corrosion, these tanks are equipped with systems for temperature and pressure control. Safety considerations are integral to prevent leaks and evaporation. Types of storage tanks include:.

What happened to Morocco's strategic oil reserves?

Morocco's strategic oil product reserves have dwindled significantly. SAMIR's storage capacity of 2 million tons, previously maintained at a healthy 1.5 million tons, is no longer a national asset.
