

40 kWh solar power generation system

Overview

What is a 40kW Solar System?

The beauty of a 40kW system lies in its ability to transform sunlight into clean, renewable energy, day in and day out, without a whisper of complaint. Imagine reducing your reliance on the grid and envision the satisfaction of contributing to a greener planet. That's the promise of going solar with a system of this size.

How much space does a 40 kW solar system need?

A 40 kW Solar Kit requires up to 2,200 square feet of space. 40kW or 40 kilowatts is 40,000 watts of DC direct current power. This could produce an estimated 3,000 to 4,000 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.

What is a 40kW hybrid solar system?

A 40kW hybrid solar system is a feature-packed solar system option. It is ideal for the customers who want the following list of features. The average generation capacity of a 40kW solar system is 160 units/day. $4,800 \text{ units} \times 12 \text{ months} = 57,600 \text{ units/year}$. There is a 5 years warranty for the complete system and 25 years for the solar panel.
