Do I need a 12V or 48V inverter?

Simply put, if you have a 12V system, you need a 12V inverter; a 48V system requires a 48V inverter. Standard Pure Sine Wave inverters simply change DC power to AC power. Inverter Chargers handle this function plus allow you to charge your batteries off shore power or a generator. Renogy's 3500W Solar Inverter Charger is designed for a 48V system.

What is a 48 volt inverter?

In other words, it is a device that can take current from a bank of batteries (48V) and convert it to the type supplied in the grid to power your appliances and devices. I suggest you use A 24-volt inverter or 36-volt inverter or 48-volt inverter when you need to power appliances over 3000 Watts.

Can a 48V inverter be rated at 2 kVA?

In this post I have explained a simple 48V inverter circuit which may be rated at as high as 2 KVA. The entire design is configured around a single IC 4047 and a few power transistors. I am a big fan of u.i am a wisp. i need an inverter design with 48volt DC input and 230volt output supply and output power in the range up to 500w.
