## Overview

---

### How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

### How much does a 5G network cost?

Here's a look at the main costs involved: The core network is the backbone of your private 5G setup. Investing in core network equipment can cost around \$300,000 initially, with annual licensing fees that may reach \$100,000. However, as the market grows, these costs are expected to decrease, making it more affordable for enterprises.

### How much does a private 5G deployment cost?

Initial costs can be around \$100,000. Backhaul connectivity, which links the core network to the internet, can also be a significant expense, often costing \$30,000 to \$80,000. Understanding these costs is essential for budgeting and planning your private 5G deployment effectively.

### How much does 5G infrastructure cost?

The total cost of 5G infrastructure is staggering, with projections estimating that telecom companies will spend over \$2 trillion globally by 2030. This includes investments in spectrum, network densification, fiber backhaul, energy-efficient infrastructure, and emerging technologies such as AI and automation.
