

Angola Crystalline Silicon solar Curtain Wall Project

Overview

What is a polysilicon plant in Angola?

The National Petroleum Company of Angola (Sonangol) has entered into a memorandum of understanding with China's Qinghai Lihao Clean Energy to establish a polysilicon plant in Angola. The project, centered on quartz mining, will produce metallurgical silicon and polysilicon for photovoltaic (PV) module manufacturing.

Will Angola have a solar panel industry based on quartz mining?

Sonangol said that the agreement paves the way for Angola to have a solar panel industry based on quartz mining, as well as the production of metallurgical silicon and polysilicon, for the production of solar panels, within a few years.

Why is Angola launching a solar project?

The project marks an important step for Angola in the solar energy sector, which aims to target Africa's rich source of high-purity quartz and set up a package of projects covering the entire industrial chain from quartz ore, quartz sand, polycrystalline silicon up to solar modules.

Can Angola produce solar panels?

According to the memorandum of understanding, the two parties will co-operate in the development of Angola's quartz ore resources for the production of metallurgical silicon and polysilicon, which in turn will be used to manufacture solar panels.
