

Arc flash switchgear for sale in Turkey

Overview

What is switchgear & how does it work?

Switchgear is a term used to describe electrical equipment specially designed to protect the electrical system from high voltage. There are a variety of switching devices, including circuit breakers, fuses, and disconnectors. It can be divided into two parts, switches and fuses.

What are the different types of switchgear?

There are three basic types of switchgear: An automatic transfer switch (ATS) is a device that automatically transfers power from one circuit to another when current is interrupted in the first circuit. ATs, electric motors, heaters, air conditioners etc. It is used to prevent critical loads from being damaged by overload conditions.

What are the components of a power arc switch?

They consist of two components: a magnet and a ferromagnetic material. When the magnet moves away from the ferromagnetic material, the flow of electric current increases, causing the arc to extinguish. This type of switch can be mounted directly on the line or at any point along the line.
