

# **Are wind power batteries for Tunisia s solar container communication stations big**

## Overview

---

Is Tunisia a viable wind energy source?

Furthermore, Tunisia has the potential to implement viable wind energy projects that satisfy fundamental economical profitability (Georgiou et al., 2008). Moreover, the Tunisian authorities committed to expediting the development of wind energy sources since 2000 by finding instruments to encourage this expansion.

Can offshore wind power be used in Tunisia?

Offshore wind power has the potential to play a key role in achieving the future renewable energy targets due to the country favorable geographic location and coastline. However, there are currently no offshore wind farm projects nor experiences in Tunisia.

Does wind energy affect the Tunisian electricity mix?

Wind energy in the Tunisian electricity mix and the environmental aspects of wind farms were also investigated. Brand and Missaoui (2014) evaluated five power mix scenarios and concluded that best-ranking electricity mix scenario consist of 15% wind, 15% solar and 70% natural gas-generated electricity.

Why is Tunisia a good place to study wind energy?

Tunisia has the potential to promote research that can solve renewable and wind energy problems and prepare the skilled workforce for an expanded wind energy industry (Schäfer, 2016).
