

# Australia container generator BESS

## Overview

---

What is a Bess energy storage system?

It is designed to provide backup power, intelligent energy storage management and integration with a wide variety of inputs and outputs. Available in either a 10ft, 20ft or 40ft ISO CSC container, the BESS is designed to be cost-effective, safe, easy to transport, scalable and integrated to the specific energy requirements of our clients.

Why should a business use a Bess generator?

With a focus on reliability and efficiency, our BESS solutions empower businesses and communities to achieve energy independence and sustainability. From outback stations to off-shore platforms; remote communities to isolated mining sites – all have a need for reliable electricity and still, in the 21st century that's often via diesel generators.

Why is a Bess project a good investment in Australia?

The increase in energy consumption, driven by rapid electrification, data consumption and AI, coupled with Australia's supportive regulatory policies and record low renewable energy capital expenditures (capex) costs, have fuelled a competitive environment for quality BESS projects.

What makes a Bess unit a good choice for Australian conditions?

For Australian conditions Fully insulated, temperature-controlled and designed to survive the harsh Australian conditions; our BESS and teams have a proven track record of successfully deploying BESS units in remote outback Australia. Adaptable
