

Australian home energy storage

Overview

How many battery energy storage systems were installed in Australia last year?

A record 72,500 battery energy storage systems were installed in Australian homes and businesses last year but energy industry data analyst SunWiz is predicting the market to accelerate rapidly in the coming 12 months with the federal government's \$2.3 billion (USD 1.49 billion) Cheaper Home Batteries Program to kick off next month.

How is energy stored in Australia?

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage systems at small scale, used mainly for backup. To balance energy use across the Australian economy, heat and fuel (chemical energy) storage are also required.

Why do Australians need solar battery storage?

As more Australians embrace solar energy, battery storage solutions have become essential for maximising its benefits. With the right solar battery storage system options, homeowners can store excess energy, reduce reliance on the grid, and enhance energy independence.

How many energy storage systems were installed in Australia in 2024?

SunWiz said a record 72,500 residential energy storage systems were installed throughout the country in 2024, delivering a combined total of 852 MWh and boosting the cumulative tally of home energy storage systems installed in Australia to more than 320,000 totalling 3.6 GWh.
