

Battery inverter to power home

Overview

What is an inverter battery?

The inverter battery and inverter cables are usually connected to the power connection of the home. An inverter battery for home can be any rechargeable or secondary or storage battery (electrochemical power source) like a lead-acid battery, nickel-cadmium battery or Li-ion battery.

How do I install a power inverter?

To install a power inverter, first place it near the battery, close to where you will be running your appliances from. Ensure some space between the inverter and the battery for proper cooling. Do not attach the inverter to the battery during this step.

What is a power inverter?

Power inverter that converts DC power to AC power provides a great convenience people's lives, especially in home appliances, such as air conditioner, refrigerator, TV, VCR, etc. In order to optimize the use of the inverters in these home appliances, people should pay much attention to proper operation of power inverters.

How to choose an inverter battery?

One easy way is to use an inverter battery calculator. This will help you calculate the energy needed to keep everything running smoothly when the power goes out. i.e., If you have a higher power requirement in your household, you should opt for a higher Ah battery (200Ah or 220Ah) for a better back up.
