

Behind the land acquisition of the 7 billion energy storage project

Overview

When did the Edwards Sanborn solar & energy storage project reach full capacity?

It reached full capacity in January 2024, just before its official inauguration. The project's impressive scale was captured by the Landsat-9 satellite on January 12, 2024. The Edwards Sanborn Solar and Energy Storage project is the largest of its kind in the US and the world.

How did energy storage grow in 2022 & 2023?

The US utility-scale storage sector saw tremendous growth over 2022 and 2023. The volume of energy storage installations in the United States in 2022 totaled 11,976 megawatt hours (MWh)—a figure surpassed in the first three quarters of 2023 when installations hit 13,518 MWh by cumulative volume.

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Behind the land acquisition of the 7 billion energy storage project

[THE TURNING TIDE OF ENERGY STORAGE](#)

Mar 4, 2024 · We have advised on the development, financing, acquisition, and construction of numerous electric energy storage projects, including flow and lithium-ion batteries, pumped ...

[Energy Storage Projects Worth Over ¥17 Billion Pushed ...](#)

Nov 14, 2025 · It is reported that the project has a total investment of approximately 7.4 billion yuan, a total land area of about 955,000 square meters, and a total construction area of about ...
