

Brazil Solar Base Station China

Overview

What is Panati photovoltaic power station?

The Panati Photovoltaic Power Station in Brazil, invested and led by the Brazilian branch of China State Power Investment Corporation (SPIC), was officially put into operation on June 19. The power station has an installed capacity of 292 megawatts and can provide clean energy for more than 350,000 local households every year.

How much will Brazil's new power plant cost in 2029?

"With an investment of 20 billion reais (\$3.4 billion), the project will supply 5 million kilowatts of power to regions including the capital Brasilia and is scheduled to be put into operation in 2029," said Wang Xiaogang, chief technical officer at State Grid Brazil Holding.

Why is Brazil launching a mega project?

The Brazilian Minister Alexandre Silveira said that the mega project will play an important role in improving the safe and stable operation of the power grid in his country, promoting wind and solar energy in northeastern Brazil to support the green and low-carbon development of Brazil's economy and society.

How many power-transmission projects has State Grid won in Brazil?

Since then, State Grid has won about a dozen power-transmission projects in Brazil. "Among them, the most noteworthy is the Belo Monte project that has been put into operation," said Wang. The 2,500-km Belo Monte ultrahigh voltage (UHV) transmission project, which started in 2014, was completed in two phases, both ahead of schedule.
