# Brussels 2025 Energy Storage Site

## Overview

---

NHOA Energy, global provider of utility-scale energy storage systems, has been awarded by ENGIE the contracts for the Supply, Commissioning and the Long-Term Service of a new 80 MW / 320 MWh Battery Energy Storage System (BESS) to be installed at the site of ENGIE's Drogenbos power station, near Brussels. What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore “energy atoll” (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

Where is Europe's largest battery energy storage system located?

Engie and Sungrow have commissioned the first 400 MWh phase of mainland Europe's largest battery energy storage system in Vilvoorde, Belgium, with full capacity due by end-2025.

How much energy storage will the Netherlands need by 2050?

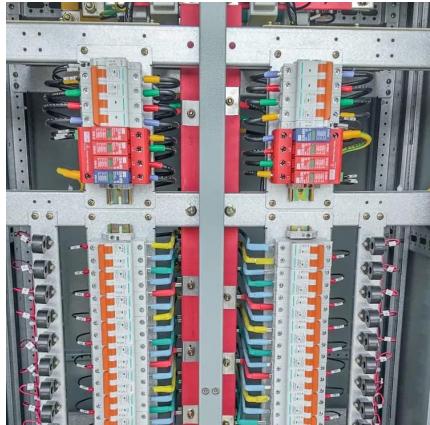

Officials have said the Netherlands will need between 29 and 54 GW of energy storage capacity by 2050 to support a renewables-heavy power grid. “We are very excited to work with GIGA Storage BV on the Buffalo project, which is an important step to reach their ambitious goal of deploying 1.5 GW of energy storage in Europe by 2025.

When is the energy storage global conference 2025?

The eighth edition of the Energy Storage Global Conference (ESGC) will take place on 14 – 16 October 2025 in Brussels. The Energy Storage Global Conference (ESGC) offers a unique opportunity for industry, researchers and policymakers to exchange views on key issues faced by the energy storage sector.
