

Cambodia solar Module Project

Overview

Will Cambodia invest 210 billion in solar energy by 2043?

Phnom Penh, Cambodia – The Cambodian government has announced a historic investment plan in solar energy projects worth over 210 billion baht by 2043. This is part of its Power Development Masterplan (PDP) to transition the country towards clean energy and reduce carbon dioxide emissions.

How many solar power plants are there in Cambodia?

Just two solar power plants are up and running in Cambodia at present, one a 10-MW plant developed by Singapore's Sunseap and another, 60-MW facility in Kampong Speu. Cambodia consumed a total of 2,650 megawatts of electricity in 2018, an increase of about 15% compared to 2017, according to the Ministry of Mines and Energy.

Are solar power projects a good investment in Cambodia?

Krungthai COMPASS, a financial advisory firm, estimates that solar power projects in Cambodia can generate attractive returns on investment, with an internal rate of return (IRR) ranging from 4.18% to 19.35% and an average payback period of 4.9 to 12.3 years, depending on the electricity selling price offered in the auction.

Why is Cambodia launching a solar project in Kompong Speu?

Cambodia's recent initiative in Kompong Speu is just a part of an expansive plan to expand its renewable energy capacity. As the country continues to explore and invest in solar power, this project sets a precedent for future endeavors.
