

Can I open the battery cabinet after the UPS is turned off

Overview

Can I replace the batteries in my ups without turning off?

Customers may wish to replace the batteries in their UPS without turning off their attached load. We call this feature "Hot Swap Batteries". Due to the nature of the Stand-by and Line-Interactive topologies, the Back-UPS family of products allows for "Hot Swapping" of its internal battery.

What happens if a battery is removed from a ups?

Also, be advised that if during this time frame while you have the battery removed, if the power is lost to the UPS, it will turn off since theres no battery.

How to choose UPS battery cabinets?

Furthermore, the cabinets need to offer removable hinged doors so that the UPS system can be easily accessed. Doors need to be locked for safety and security. UPS Battery Cabinets have to be designed to house most front terminal batteries. Your UPS Battery Cabinets should have removable side panels so that cables can be easily installed.

Can I do a hot swap on the battery?

Yes, you can do a hot swap on the battery on this model. Just make note that when you remove the battery thats in there currently, the UPS may start flashing the replace battery light and make a beeping noise, which is normal since you are removing the battery and it isnt detected it.
