Can solar panels replace roofs

Overview

Should you choose solar during a roof replacement?

That isn't the only way you'll save by choosing solar during a roof replacement. Solar panels last about 25-30 years, which is similar to the lifetime of a roof. By doing both at the same time, you avoid needing to have your solar panels re-installed after replacing your roof, which can save money in the long-run.

How much does it cost to replace a roof before solar?

If you have an asphalt roof over 5-10 years old, you'll probably want to replace it before going solar. Replacing your roof and installing solar costs about \$30,000. If you need to replace your roof after you install solar panels, expect solar panel removal and reinstallation to cost anywhere from \$1,500 to \$6,000.

Should I synchronize my solar panel installation with my roof replacement?

Roof replacement timing: If a roof replacement is already on your horizon, it's strategic to synchronize this with your solar panel installation. Doing so aligns the lifespan of both components and streamlines the overall process.
