

Chad solar container battery parameters

Overview

What are the parameters of 314ah battery pack?

Parameters for 314Ah Cell customized configurations, ease of maintenance, and future expansion capacity. The battery Pack consists of 104 single cells, the specification is 1P104S, the power is 104.499kWh, and the nominal voltage is 332.8V.

What is battery capacity?

The term "capacity," which is used to refer to a battery's ability to hold and distribute electrical charge, is indicated by the letter "C". It is a key variable that determines how much power a battery can deliver. The ampere-hour (Ah), which measures how much electric current a battery can produce for an hour, is the common unit of capacity.

How many amps can a 10AH battery discharge?

Batteries are categorized according to the multipliers of capacity that define their maximum permitted discharge rate. Therefore, if a 10Ah battery's permitted discharge rate is 2C, the battery may only be drained with a maximum of 20 Amper. Aging: The capacity of batteries decreases over time.
