

# **Check the box to install an uninterruptible power supply**

## Overview

---

What is the scope of activities for installing uninterrupted power supply (UPS)?

1.1. Scope of Activities This scope defines the minimum standards for installing Uninterrupted Power Supply (UPS). The UPS, Batteries, I/O Panel with integrated PDU, and all the internal power/control cabling will be provided and installed.

How do I find a power supply?

Shop for a uninterruptible power supply. Look in office supply stores, big box electronic stores, specialty computer stores, or on the internet. For a desktop PC, what you're looking for is enough power to supply your computer (the beige or black box), the monitor, and whatever critical IO devices are connected to it.

How do I install a hardwired UPS system?

Hardwired UPS systems should be installed by a UPS specialist or the UPS supplier. The first step in installing a UPS system is to determine the power needs of your facility. This includes identifying the number and types of devices that will be connected to the UPS, as well as the total power consumption of those devices.

How do I install an ups?

This typically involves mounting the UPS itself, as well as connecting it to the power source and to the devices that will be connected to it. It's important to follow the manufacturer's instructions for installation and to ensure that all connections are secure and properly made.
