Communication Micro Base Station

Overview

What is LBA 3 micro base station?

it is below 300m.In the hybrid communication model, LBA 3 can effectively cover the signal-blind area of communication and obtain reliable communication quality. LBA 3 micro base station supports access to CUAVCloud and other UAV cloud platforms, to realize more advanced functions such as UAV management, team collaboration, remote.

What is LBA 3 micro UAV base station?

The LBA 3 micro UAV base station adopts a dustproof, waterproof, and corrosion-resistant design, which can be placed outdoors for a long time without fear of wind and sun. It perfectly solves the problem of repeated installation in high-frequency and automated application scenarios, reduces repetitive work, and improves work efficiency.

What is a flying base station?

Flying base station relies on the traditional stationary terrestrial base . In modern cellular systems, high-rate communication is performed using MIMO transmission by a Single Base Station (BS). This method is able to improve the transmission rate when the user is at the cell-inner. However the rate severely degrades when the .

Do micro base stations supplement signal blind spots?

This paper concludes that in the case of large-scale coverage of macro base stations, micro base stations supplement signal blind spots. Finally, the work gives forward suggestions for the construction and innovative development of relevant base stations globally. ITU Radio Regulations, Section IV.
