

Comparison of a 40-foot folding shipping container and a traditional generator

Overview

How to choose a generator for a refrigerated shipping container?

Diesel, gasoline, and natural gas are good options. Generators can be really loud, so picking one with a low noise level is key. This is even more important if the generator is going to be used in your neighborhood. If you need to move your refrigerated shipping container around, it's best to go for a generator that comes with wheels.

What type of generator is used for refrigerated shipping containers?

- Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.

How big is a 40 foot shipping container?

We've learned by now that a 40 foot shipping container isn't 40ft X 40ft. It's a 40 feet long container (the dimensions are always around 40' long x 8' wide x 8'6" high- give or take a few inches depending on the vendor), so you'd need to calculate what could feasibly fit into that much space.

What are the different types of container generators?

We can supply the 20' container, 40' container, and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location, can run under the most demanding working conditions.
