## Overview

---

What are lithium iron phosphate (LiFePO<sub>4</sub>) batteries?

Lithium iron phosphate (LiFePO<sub>4</sub>) batteries are known for their high safety, long cycle life, and excellent thermal stability. They come in three main cell types: cylindrical, prismatic, and pouch. Each of these types has distinct characteristics that make them suitable for various applications.

What is a lithium iron phosphate battery circular economy?

Resource sharing is another important aspect of the lithium iron phosphate battery circular economy. Establishing a battery sharing platform to promote the sharing and reuse of batteries can improve the utilization rate of batteries and reduce the waste of resources.

What are the different types of lithium phosphate batteries?

1. Cylindrical LiFePO<sub>4</sub> Cells Cylindrical LiFePO<sub>4</sub> cells are the most commonly used type of lithium iron phosphate batteries. They resemble the shape of traditional AA or AAA batteries and are widely employed in applications where high power and durability are essential.

Who makes LiFePO<sub>4</sub> batteries in China?

Melasta is one of the main producer and supplier for LiFePO<sub>4</sub> batteries in China. Our batteries have the features due to our superior technologies and state of the art manufacturing facilities and investment on research and development. 1. Very long cycle life
