

# Corrosion-resistant folding containers for fire stations in Cape Verde

## Overview

---

What is a fire proof storage container?

Our fire proof storage containers are fully tested and certified as REI 120 in accordance with the current European standard EN 13501-2 and allow you to store flammable substances close to buildings or directly on the production floor.

What if the fire resistance is not certified?

If the fire resistance of the system as a whole is not certified, it is considered to be level 0 (zero), even if the individual components (e.g. walls, roof are separately certified). DENIOS fire resistant containers are always tested as a whole.

Do NIOS fireproof containers pass efectis fire tests?

DENIOS fireproof containers have passed Efectis fire tests in accordance with EN 13501-2. For more than 40 years, the accredited Efectis laboratory has been a recognised body for the testing and certification of fireproof products.
