

Danish single-phase uninterruptible power supply

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

What is a Schneider Electric 3 phase UPS?

Schneider Electric's 3-phase UPS range delivers superior power protection for data centres, healthcare facilities, and industrial operations. Products such as Galaxy VL and Easy UPS 3M offer modular designs, high efficiency, and lithium-ion battery options for enhanced flexibility and resilience.

Why do you need a 3-phase UPS system?

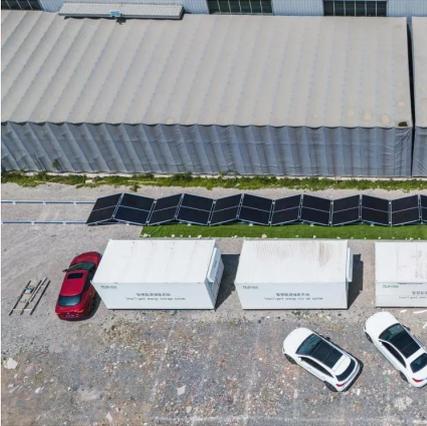

It also serves as a reliable battery backup. A 3-phase UPS system is crucial in data centres, edge computing, and industrial applications where uptime and data integrity are vital. It protects servers, storage systems, networking equipment from power quality issues.

What are the benefits of a 3 phase UPS?

Highly efficient 20 to 150 kW (480 V), 10 to 150 kW (400 V), and 10 to 75 kW (208 V) 3-phase UPS for edge, small, and medium data centers and other business-critical applications. Increased availability. Reduced operating costs. First class power protection for critical infrastructure.
