Democratic Congo solar container communication station uninterrupted power supply settlement policy

Overview

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available here. The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million households, only 1.6 million have access to electricity.

Will DRC increase electricity access?

With the 2014 Electricity.1 Act, DRC expected to increase electricity access by liberalizing the power sector. However, private sector involvement in electricity access expansion is still very limited due to many deterrents, including the country's poor institutional and legal environment.

How does the World Bank support DRC?

Through the Electricity Access and Service Expansion project, the World Bank supports DRC's efforts to improve infrastructure governance by building the capacity of key power institutions as well as institutional and regulatory strengthening. This is a crucial step to support DRC's goal to provide electricity to 26.5 million households by 2030.

How will the DRC meet the ELEC-Tricity challenge?

The DRC aims to connect 32% of the country to electricity by 2030. Meeting this challenge will require co-ordinated efforts from various stakeholders, supportive policies and regulations, and technical assistance support to prospective projects in order to attract investments.
