This section provides an overview for uninterruptible power supplies (ups) as well as their applications and principles. Also, please take a look at the list of 68 uninterruptible power supply (ups) manufacturers and their company rankings.

What is an ups & how does it work?

An UPS is a device that supplies power to connected devices for a certain period of time in the event of a power failure due to a power failure. It has a built-in battery and supplies power to servers, PC electronic equipment, network equipment, etc. in the event of power failure or power supply trouble, for example.
