

Distribution cabinet cleaning container base station

Overview

Why should you use IBC containers® washing stations?

IBC Containers® washing stations have been designed to ensure a hygienic process with little effort for all types of containers. With minimum intervention of your operators, the IBC cleaning system will help you to save considerable time in the process of cleaning your bins.

What is a wet processing & cleaning station?

Terra's Wet Processing and Cleaning Stations provide economical solutions for semiconductor acid etching, wafer processing and other wet chemical processes. These wafer fabrication cleaning stations are available in integrated and modular configurations.

How does a container washing station work?

The external cleaning is done via static nozzles strategically set to clean all the container surfaces but also the top and the drain valve. Our container washing stations have been designed to fit the environment of your plant, but also to facilitate their maintenance.

What is a modular wet cleaning station?

Modular Wet Cleaning Stations offer more flexibility, with the wet station and overhead laminar flow hood as separate units. Terra's Solvent Spray Booth with full stainless steel construction features fire-resistant components and safety systems, ideal for applications with flammable chemical solvents.
