Does North Korea have a power shortage?

North Korea suffers from chronic energy shortages. Rolling blackouts are common, even in the nation's capital, while some of the poorest citizens receive state-provided electricity only once a year.

Does North Korea have enough electricity?

North Korea has been unable to generate enough electricity for its needs for decades, and not even the capital – home to the most loyal and trusted citizens -- was immune to rolling blackouts. Last month, however, Pyongyang began supplying electricity to homes around the clock, according to sources.

Does North Korea have energy security challenges?

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting.
