BUHLE POWER

Dublin PV panel dimensions

Overview

How many solar panels do you need in Dublin?

Dublin gets approximately 1,300 hours of sunlight per year, one 550-watt solar panel can generate about 2.2 kWh of electricity per day. To meet a daily consumption of 20 kWh, a professional solar installer may suggest that around 9-10 solar panels would be needed, typically installed as whole units depending on budget and energy needs.

How much does a solar PV system cost in Ireland?

Before installing solar PV panels, think about: A registered installer can assess your home and recommend the right system size and panel type for your needs. In Ireland, a standard solar PV system costs between €6,000 and €10,000 — depending on size, panel type, and any extras like battery storage.

How big should a solar panel be in Ireland?

Most solar panels installed in Irish homes fall within a standard range, but it's useful to understand the common measurements and weights before planning your system. Most residential panels measure around 1.6 to 2 metres tall and just over 1 metre wide.

How long do solar panels last in Dublin?

We find that the return on investment (ROI) from solar panels in Dublin is typically 5-7 years. With a 4kWp solar system, households in Dublin can generate between 3413.73 kWh and 4042.62 kWh of electricity, annually. This results in annual savings between €1467.90 and €1738.33, assuming a 43 cent unit rate, typical in Ireland.
