

EU 1GW PV Module Project

Overview

Where is Europe's largest PV module Gigafactory located?

Holosolis announced Europe's largest PV module gigafactory, to be built in Moselle, France. Aiming to accelerate Europe's solar PV manufacturing capabilities to ensure continental energy security, the new production site will see the capacity of Europe's current largest factory bested by almost 70%.

Could European manufacturing play a role in global solar production?

Plans for gigafactories in Germany, including one in Wilhelmshaven, show how European manufacturing could once again play a key role in global solar production. It's not just niche products that could benefit from a European comeback.

When did over easy solar start producing VPV units?

In 2023, Over Easy Solar commenced the production of their VPV Unit, specially designed for green and flat roofs. This achievement came after an intensive two-year period of research, development, and prototyping.

Will Germany's 'New Elektrizitätswerke Wilhelmshaven' start producing a gigawatt solar?

This is where Germany's still-excellent solar R&D may come into play. The factory is operating under the project name NEW – Neue Elektrizitätswerke Wilhelmshaven – and could begin producing one gigawatt as early as next year, scaling up to three gigawatts by 2028.
