

European home energy storage projects

Overview

What is the European energy storage inventory?

From pv magazine Germany The European Commission has officially launched the European Energy Storage Inventory, a real-time dashboard for energy storage. The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

How many energy storage projects are there in Europe?

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology. It lists 32 countries and is led by Germany, with 472 projects. It is followed by the United Kingdom (455 projects), Spain (147 projects) and Italy (112 projects).

What is the largest energy storage project in Europe?

Particularly noteworthy is the ambitious project in Alfeld (Lower Saxony), which is considered the largest approved storage project in Europe with a performance of 137.5 megawatts and a storage capacity of 275 megawatt hours.

What is the future of home storage in Europe?

The European market for home storage is developing even more dynamic. Solarpower Europe expects an increase in total storage capacity by 300% to 32.2 GWh by the end of 2026, which corresponds to the supply of 3.9 million European households.
