

Fast charging of folding containers for wastewater treatment plants

Overview

What is a water treatment plant in container?

A water treatment plant in container is a complete solution, assembled and tested off-site at our factory. The solution is complete with all internal piping and wiring factory-built. This makes the plant ready for use when supplied, which financially can be an advantage, also in relation to the reduced amount of time used for deployment.

Can a mobile water treatment plant be used in a container?

This customer needed to upgrade the existing water treatment plant, but no free space at site was available. Mobile water treatment in a container was the solution of choice. Cooling water treatment for a chemical company in Russia. The company chose a plug-and-play 8' container installation for the water treatment.

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.

What is containerization of a water treatment plant?

Containers installed on site Containerization of a water treatment plant does not only include the supply of a container, it includes the complete installation of the plant: Cabling and wiring of pumps and instrumentation inside the container to main control cabinet. We can deliver our systems in insulated (20 or 40 ft) containers.
