## Overview

---

What are the different types of energy solutions in Fiji?

Delivering secure, cost-effective hybrid and utility grade power solutions, for today and the future. Our specialities in Fiji include Solar Energy, Renewable Energy, Hybrid Energy, Distributed Generation, Energy Storage, Off-Grid Energy, Remote Communities, HV, Substations, Grid Connections, Battery Energy Storage Systems (BESS), and Microgrid.

Why do businesses use solar energy in Fiji?

With on-site solar energy generation in Fiji, businesses can generate their own electricity and become less vulnerable to power outages, grid disruptions, and energy supply constraints. Many organisations in Fiji switch to solar energy as part of their commitment to sustainability and reducing their carbon footprint.

What is EPC solar doing in Fiji?

Indigenous-owned EPC Solar said the projects are part of a pipeline of more than 40 potential installation sites in Fiji which is targeting 100% renewable energy by 2036. The company also plans to expand its operations into New Zealand and then other Pacific nations – islands it says will bear the brunt of climate change and rising sea levels.

How does a battery energy storage system work on Taveuni?

Construction of the 1MW grid-connected solar photovoltaic farm coupled with a battery energy storage system (BESS) on Taveuni. The battery storage system augments grid stability and reliability by storing surplus solar energy for use during periods of low generation or high demand while also providing backup power during outages.
