

# Fire Station Use of Dominican Folding Container Fixed Type

## Overview

---

What is a dedicated cargo fire control station?

The Dedicated Cargo Fire Control Station (see Subsection 6/3), if fitted. In addition to the above, the system is to also provide an audible and visual alarm in the area or space where the condition has been detected.

What is a FFS container?

FFS has engineered a series of container solutions suitable for both marine and onshore applications, emphasizing flexibility, lightweight design, and compactness for ease of deployment. These self-contained units, housed in a 10-foot ISO standard container, offer superior firefighting capabilities.

How can a cargo fire control station detect elevated surface temperatures?

Have permanently installed thermal imaging cameras, or equivalent means, within the container holds that allow the crew in the dedicated cargo fire control station to identify the specific container(s) with elevated surface temperatures.

What is a fire rated container bay?

Any boundaries of the space that are common with the exterior of the structure that faces a container bay area are to be constructed with a fire rating of not less than A-60 and be covered by the water spray system addressed below. Other boundaries of the space are to have a fire-rated integrity equivalent to that of a control station.
