

# **Gambia power generation equipment container house**

## Overview

---

How much electricity will Gambia generate in 2025?

The Gambia's Electricity Sector Roadmap (2019-2025) aims to scale up electricity generation to 200 MW of available capacity at peak in 2025, with 14MW expected from the OMVG project with Guinea and Senegal, and 50MW from the Souapiti project and the remainder through Independent Power Producers (IPP).

Did Gambia import energy?

Gambia did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. For example, crude oil is refined into many different kinds of fuels and products, while coal, oil and natural gas can be burned to generate electricity and heat.

Where can I buy a container in the Gambia?

Containers can be purchased from the Gambia Agency. Do take care to photocopy the watchman's ID card and make sure you know where he lives and that he is residing in The Gambia. Only employ a watchman who has been recommended to you.

What are the different types of energy transformation in Gambia?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Gambia for 2021. Another important form of transformation is the generation of electricity.
