

Georgetown installs solar panels

Overview

Where is Georgetown solar located?

Georgetown Solar Inc. is developing a 230-megawatt (MWac) solar project located 11 kilometres south of Carseland, Alberta in Vulcan County. The Project encompasses 700 acres (400 soccer fields) and has been sited on privately owned cultivated farmland.

How does Georgetown buy solar energy?

Georgetown will purchase the energy from the solar facilities without the associated RECs, and through a second financial transaction, purchase Green-e certified RECs through a broker for an equivalent amount of power for the first five of the 15-year agreement.

Does Georgetown have a power purchase agreement?

Two-thirds of the university's electricity needs will be provided through a new recently approved Power Purchase Agreement (PPA). The 15-year agreement allows Georgetown to annually buy 100,000 megawatt-hours of electricity from 11 existing solar plants.

What is the Georgetown project?

The Georgetown Project began development in 2020 with land securement and the initiation of environmental assessments. We are committed to sharing information about the Project and working with the local community to ensure that we receive and understand stakeholder feedback and concerns.
