Why is glass manufacturing important in Germany?

Germany has a well-established glass manufacturing sector, known for its innovation and high-quality products, making it a competitive landscape. It is crucial to be aware of the stringent regulations governing environmental standards and safety protocols, which are implemented to minimize the industry's ecological impact.

What is AGC solar glass?

The AGC solar glass range covers two main applications: Building Integrated Photovoltaics (BIPV) (electricity generation) and Concentrating Solar Power (industrial electricity generation). BIPV glazing has a dual role: it is part of the outer structure of the building, while at the same time generating electricity using photovoltaic energy.

What type of glass saves energy?

Generally used in double or triple glazing, this type of glass saves energy thanks to excellent thermal insulation performance. Its superb light transmission maximises the amount of natural daylight in any building.
