# **How big an inverter should I use for a 60V solar container lithium battery**

## Overview

---

What are the different solar inverter sizes?

Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly. During our research, we discovered that most inverters range in size from 300 watts up to over 3000 watts. In this article, we guide you through the different inverter sizes.

Do I need an inverter size chart?

The need for an inverter size chart first became apparent when researching our DIY solar generator build. Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly.

How much power does a solar inverter need?

Combine your findings: Highest Surge: e.g., 600 W from fridge. → Recommended Inverter Size: 1,200 W minimum. If you later add an air conditioner (2,400 W surge), you'd bump up to a 3,000 W inverter—like the Lefor 3000W in the Lefor Solar Inverter Series.

Why is the solar inverter and Battery sizing calculator important?

Our Solar Inverter and Battery Sizing Calculator provides a simple and user-friendly solution. It is much easier to use and more convenient. Here, you can make a list of possible setups. Why is this sizing calculation essential?

First, you can use your electronic gadgets in your home with confidence.
