

# **How to shut down the communication high voltage solar container battery cabinet**

## Overview

---

How do you shut down a solar PV system?

Properly shutting down a solar PV system is a common concern among users. Within the entire system, the AC side can be disconnected via the NFB (no-fuse breaker) on the AC distribution panel.

Why do I need a high-voltage box / PCs/ups / EMS?

These enable seamless communication with the high-voltage box, PCS/UPS, or EMS, supporting data exchange and control for the energy storage battery management system while ensuring robust system protection. Email us with any questions or inquiries or use our contact data.

How to connect a battery to an energy storage inverter?

10 10.4 It should be  $> 6$  AWG. Connect the positive and negative poles of the battery to the positive and negative terminal of the DC port of the energy storage inverter (or the junction box) with a red and black cable respectively. The connection of several batteries is only permitted in parallel.

How do I shut down my inverter?

Recommended Shutdown Procedure: Use the shutdown feature on the machine or through the monitoring system to perform the shutdown operation. Shutting down the inverter will prevent backflow to the grid, ensuring grid stability and personnel safety.

## How to shut down the communication high voltage solar container
