

Huawei Lithuania Energy Storage Project

Overview

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024. How will Lithuania support energy storage projects?

Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU. The programme will provide direct grants for the construction of the projects, with a target to support at least 1.2GWh of energy storage projects.

Will EU grant a battery storage project in Lithuania?

Why should Lithuania invest in batteries?

It will also enable Lithuania to disconnect from the Russian controlled electricity grid and synchronize with the continental European electricity grid. In case of accidents, batteries will provide instantaneous electricity reserve service in less than one second. In the future, batteries will help to integrate renewable energy sources.

How much is energy storage in Poland?

The EU recently approved €1.2 billion for energy storage Poland under the TCTF, as covered by Energy-Storage.news, and in mid-2023 approved amounts under the TCTF in Hungary and Slovenia. Panelists at this year's Energy Storage Summit Central and Eastern Europe (CEE) in September described Hungary's scheme as one of the most advanced in the world.
