

Huawei solar container battery pack capacity specifications

Overview

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 kWh up to 15 kWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5kWh to 15kWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

How much power does a Huawei luna2000-2.0mwh-2h1 have?

The Huawei LUNA2000-2.0MWH-2H1 is a turnkey, containerised energy storage system with $\approx 2,032$ kWh (2.03 MWh) nominal capacity and a continuous rated power of 1,016 kW (≈ 1.016 MW) — designed for long-duration (2 h) applications, grid support and commercial/utility installations.

What is the capacity of a battery module?

Note a: The initial capacity (design capacity) of the battery modules is 5 kWh. The actual capacity may vary depending on the environment conditions, such as temperature, transportation conditions, and storage conditions.
