

# Industrial inverter ups battery

## Overview

---

What is an industrial inverter?

With these industrial inverters, very robust single and three-phase IGBT inverter systems (power range 10 kVA - 200 kVA) are available for tough industrial applications, for example as: These inverters are connected to battery-backed DC grids and reliably supply critical loads with good quality power.

What is a transformer based industrial UPS system?

Unlike transformer-less systems, transformer based industrial UPS systems use fewer number of battery sets to feed the load due to its unique architecture. Therefore battery sets get charged evenly and at optimum rates to maximize the battery life time and reduce long term battery replacement cost.

What is BMS + industrial and commercial energy storage inverter?

The complete set of energy control solutions of "BMS + industrial and commercial energy storage inverter" is suitable for industrial parks, backup power, photovoltaic storage, wind storage and other application scenarios to ensure the safety of industrial and commercial battery systems. Safe operation and system performance optimization.

What is an industrial UPS?

Industrial UPSs are regarded as fully customized power supply systems for rugged environments and designed particularly to safeguard critical loads in industrial applications where voltage transients, created by degraded mains supply, can seriously damage both UPS and the critical load.
