

# Install solar panels at the door

## Overview

---

### How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

### How do I install my own solar panel array?

The easiest way to install your own solar panel array is to buy a solar panel kit. The main solar components that come with every solar power system or solar panel kit are: Solar Panels Solar panels convert sunlight into electricity through a process called the photovoltaic effect.

### Are solar panels easy to install?

Installing solar panels is usually relatively quick and straightforward, but it's still worth getting to know all the ins and outs of how it happens. After all, considering how much solar panels cost, it makes sense to understand the process.

### How do I connect my solar panels to my home?

Once you've installed your new solar panels, you can connect them to your home. You'll need: Conduit carries the wires from the roof junction box to the emergency disconnect box. This vital safety feature enables you to quickly shut off your solar system, a requirement in many areas.
