

# **Intelligent Government Procurement of Photovoltaic Containers**

## Overview

---

As a clean energy source, photovoltaic (PV) power generation best meets the current demand for energy transformation. In particular, industrial distributed PV projects in China have developed rapidly, forming

Should solar PV supply chain services be included in the IRENA report?

This IRENA report takes stock of the key quality infrastructure (technical) and ESG services that should be considered by solar PV stakeholders to bolster supply chain activities, as well as make them more inclusive. [Download Annex data here.](#)

Why is solar energy a sustainable public procurement strategy?

access in underserved regions. The success of the solar energy initiative exemplifies how sustainable public procurement can effectively tackle both environmental and social challenges, paving the way for broader adoption of.

Should government subsidies support PV supply chain companies?

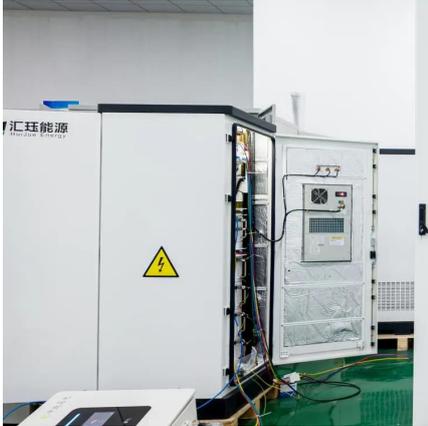

When supported by government subsidies, the government should give full consideration to the power structure of the PV supply chain companies, and the relationship of equal status of supply chain companies is most conducive to the government's implementation of PV subsidies.

How do government subsidies affect the PV industry?

However, lucrative government subsidies often lead to PV enterprises not paying attention to technological innovation and blind production. Therefore, to improve the efficiency of government subsidies, enhance the overall performance of the PV supply chain, and achieve the healthy and long-term development of the PV industry.
