Is it worth installing a solar system at home

Overview

Should you install solar panels at your home?

When you install solar panels at your home, you generate your own electricity—which means you become less reliant on your electric utility company and reduce your monthly electric bill. A solar panel system typically has a 25- to 30-year lifespan, so you can cut your electricity costs for decades by going solar.

Is a home solar energy system a good option?

A home solar energy system is one of the most popular and efficient alternatives to traditional power sources. Solar panels have many environmental benefits and can save homeowners money over the long term. While costs have decreased recently, installing and maintaining solar panels can still be expensive.

How much does a solar panel installation cost?

This will increase the price of labor and the overall cost of solar panel installation. Funding method. A solar panel system can cost between $17,238 and $23,235, with the national average at $20,552 after federal tax credits, based on EnergySage Marketplace quotes.

Are solar panels worth it?

For many homeowners, the large up-front investment for a solar panel system installation is worth it for the reduced energy costs and potential tax savings. Factors that homeowners will want to consider before deciding to install solar panels include local energy costs, geographic location, roof pitch, and funding method. Local energy costs.
